Disclaimer

This presentation (the "Presentation") is being furnished on a confidential basis to a limited number of sophisticated investors as part of an overall invitation or an offer to sell or solicitation of interest in Estee I-Alpha PMS managed by Estee Advisors Private Limited or its affiliates mentioned in the Disclosure Document. This Presentation must be read in conjunction with the Disclosure Document that has been filed with the Securities and Exchange Board of India (SEBI) in India and is the most updated version at the time of offering and other relevant documents in the investor packet. Any offer or solicitation is being made only pursuant to the confidential Disclosure Document, as amended or supplemented from time to time, which describes the risks relating to an investment in a PMS as well as other important information. Material terms mentioned herein are subject to change and prospective investors are urged to request any additional information they may consider necessary or desirable in making an informed investment decision.

This Presentation is based on or derived from information which is believed to be reliable and no representation is made that it is accurate or complete. No reliance may be placed for any purpose on the information and opinions contained in this Presentation and no representation, warranty or undertaking, express or implied, is given as to the accuracy or completeness of the information or opinions contained in this Presentation and no liability is accepted by such persons for the accuracy or completeness of any such information or opinions, and nothing contained herein shall be relied upon as a promise or representation whether as to past or future performance. Please note that Past Performance is not an indicator or guarantee of future results. Investors should determine for themselves the relevance of the information contained in this Presentation and any subsequent decision to invest in the PMS should be based on such investigation as they themselves deem necessary. An investment in the PMS is suitable only for sophisticated investors and requires the financial ability and willingness to accept the high risks and lack of liquidity inherent in such a transaction. The PMS invests in derivatives which by construct employ leverage and can lead to magnified losses or gains on the base capital deployed. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. The securities quoted are for illustration only and are not recommendatory. Registration granted by SEBI, membership of BASL (in case of IAs) and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors.

The distribution of this Presentation in certain jurisdictions may be restricted by law. This Presentation is only directed at persons to whom it may lawfully be distributed and any investment activity to which this Presentation relates will only be available to such persons. It is the responsibility of any potential investor/distributor to satisfy itself as to the full compliance of the applicable laws and regulations of any relevant jurisdiction, including obtaining any governmental or other consent and observing any other formality prescribed in such jurisdiction. This Presentation is proprietary to Estee and may not be disclosed to any third party or used for any purpose without the prior written consent of Estee Advisors Private Limited.

Quant Approach

Opportunities evaluated		5000+ per second
Number of securities scanned		1000+ per second
Number of orders		10+ per second

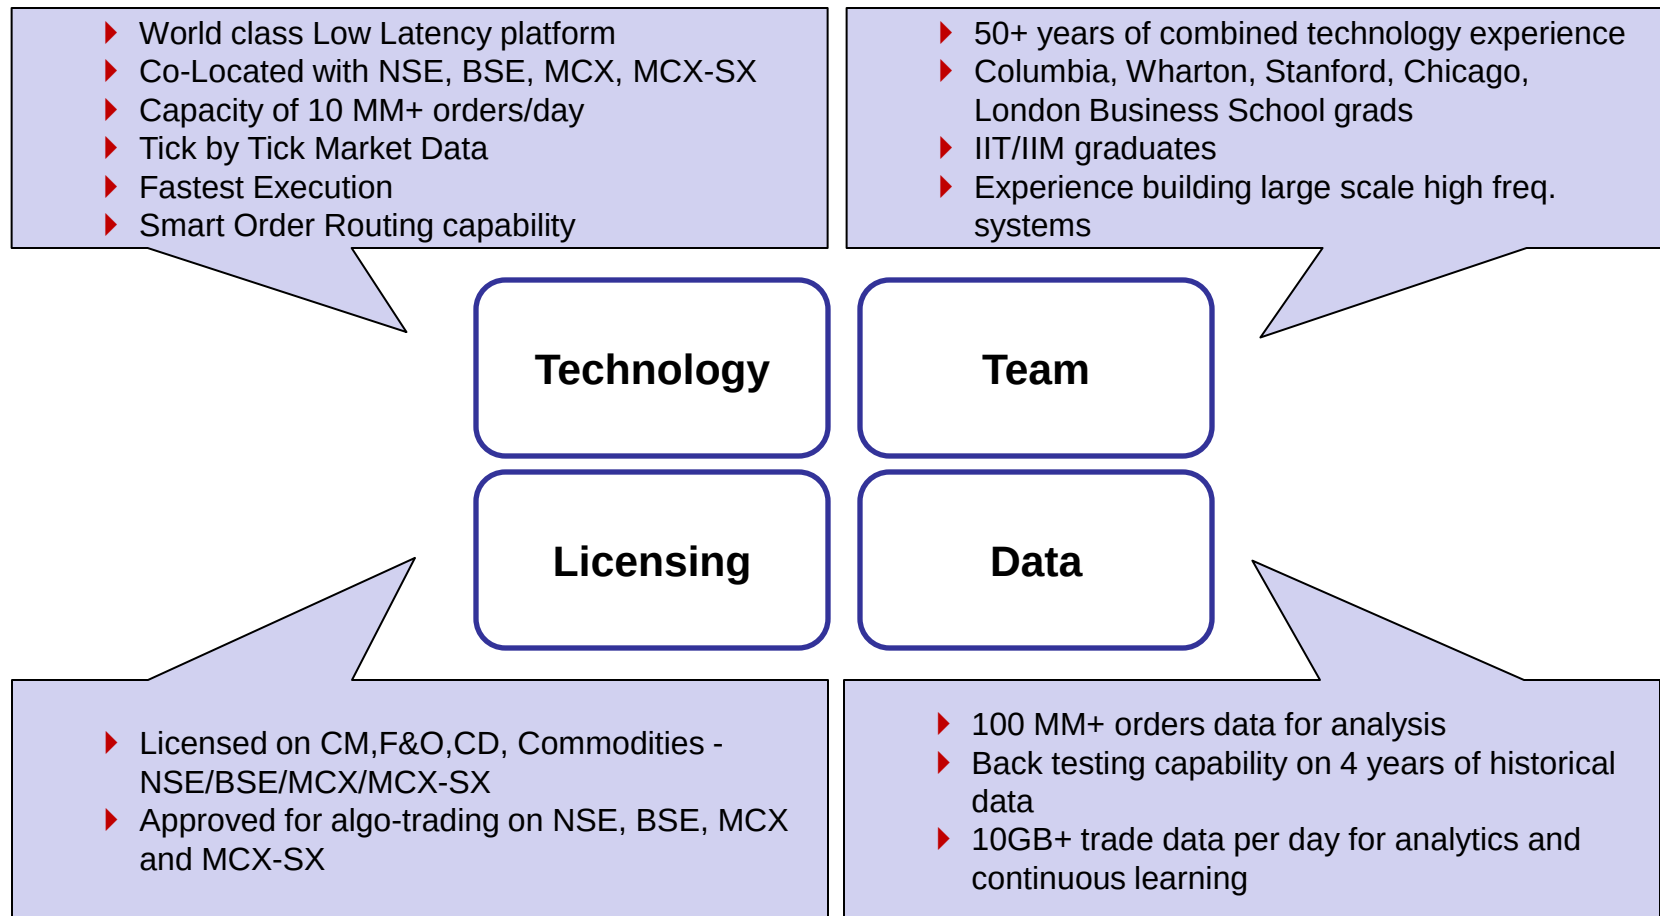

► Statistical advantage

- Sophisticated models identify investment opportunity
- High speed; e.g. latency in single digit millisecond
- Robust back testing to establish signal; out of sample validation
- Consistent process to maintain an edge

► Reducing risks

- Minimal to no human intervention
- Objective variable based criteria rather than human discretion
- Manage risks real-time
- Complete transparency

Product Overview: I-Alpha

Fund Summary

I-Alpha is Estee's market neutral arbitrage product which aims to deliver consistent returns while maintaining nearly zero market exposure. The algorithm identifies mispricing between various market instruments at any given point of time and takes hedged positions to capture the pricing differences. Our positions are hedged using equivalent risks (e.g. index futures against its components). In most cases, we can create a perfect hedge however, in certain cases we are not able to create a perfect hedge as the equivalent instruments may not have the liquidity or listed products to take the required positions. In such cases, we construct the hedge with equivalent securities with as close a hedge as possible. In simple terms, this is an arbitrage product that does not take any directional bets. All the trades captured by this fund are balanced at the time of execution locking in a pricing gap opportunity. Price movement typically has minimal impact on our portfolio and underlying risk is typically expected to be the same, but there may be marginal price / venue risk as different sides of the arbitrage trade could be taken in different exchanges / markets.

Return

Since its inception in 2009, I-Alpha has delivered average monthly return of 0.93% post fees and expenses. I-Alpha has not had a single negative return month till date.

Risk

I-Alpha fund returns have had an annualized standard deviation of 1.68% since inception to date while delivering a Sharpe ratio of 2.20 over the same period

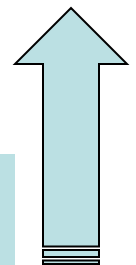

Live Example – Index Arbitrage

- ▶ The algorithm identified a mispricing between present value of the BANKNIFTY future and the sum of the present values of all the individual components of the BANKNIFTY (weighted in the proportion in which they comprise the index)
- ▶ For efficient markets, the value of an index future should be same as the sum of the future values of all its individual components weighted in the same proportion as they comprise the index (referred to as the basket). If there is a divergence, there exists an arbitrage opportunity.
- ▶ To exploit this mispricing, an automated trade comprising a buy order on the basket and a sell order on the BANKNIFTY is executed
- ▶ By executing this transaction, we have locked in a profit, irrespective of the values of the basket as well as the BANKNIFTY at maturity

	Stocks	Weights	Price	Value
Buy	ICICI Bank	3.21	783.25	2,517.68
	HDFC Bank	5.03	506.20	2,544.52
	SBI	0.72	2,056.05	1,478.30
	Axis Bank	0.72	970.95	698.89
	Bank Of Baroda	0.52	688.75	360.84
	Kotak Mahindra	1.04	563.50	583.34
	PNB	0.37	755.50	280.37
	IndusInd Bank	0.97	298.40	288.52
	Canara Bank	0.40	402.10	160.36
	Yes Bank	0.68	329.85	224.23
	Union Bank of India	0.63	201.65	126.62
	Bank of India	0.52	340.85	177.38
	Total			9,441.03
Sell	BANKNIFTY	1.00	9,441.50	9,441.50
Locked-in profit	PNL			0.47

Immediate profit lock-in, irrespective of price at maturity

Estee is able to exploit small spreads (as it is a broker dealer) by minimizing transaction costs, higher lot sizes, and greater leverage

Risk Management

3-Tier Risk Management System	
Fund Level	▶ In-built thresholds of risk limits in the algorithm controlling the parameters ▶ No explicit leverage but may take implicit leverage (utilizing inherent leverage in derivative contracts).
Strategy Level	▶ Explicit market exposure budget by strategy ▶ Explicit daily stop loss budget for each strategy
Operational Level	▶ Ensure daily position and fund reconciliation across internal, broker & custodian reports ▶ Ensure exception monitoring and logging to the management team daily ▶ Reporting on intraday and end of day market exposure and P&L

Product Structure

▶ Deposit

- ▶ We place 99% of client's money with our clearing member and instruct it to create an FD with an empaneled bank or park the money with its treasury against which a line of trading margin is made available. As a discretionary PMS manager, we make that decision basis the liquidity/risk-return profile of the available options.
- ▶ Remaining 1% of assets are held as cash to meet daily MTM margin obligations
- ▶ Approximately 50%-60% of return comes from interest income and the remaining comes from arbitrage trading

▶ Subscription / Redemption

- ▶ Close-ended; can be subscribed to only once every month
- ▶ Minimum investment: 2.5 Cr for corporates and 1 Cr for individuals
- ▶ Maximum investment: 20 Cr
- ▶ Redemption notice by 20th of month for end of month payout (by 5th working day of next month)

▶ Pool Level Trading

- ▶ All client assets are pooled by Estee PMS and the broker and clearing member recognize only Estee PMS and not individual clients that have invested into Estee PMS
- ▶ Exchange only recognizes the clearing member, which in this case is Globe Capital
- ▶ Trading is done in equity F&O which are marked-to-market every day and profits/losses are allocated to client accounts at the end of each trading day
- ▶ Contract notes are issued by the broker in the name of Estee PMS
- ▶ No depository accounts are needed as I-Alpha trades only in equity F&O

Fee Plans and Charges

	Option 1	Option 2
Fixed Fees	1.00% per annum (charged quarterly)	2.50% per annum (charged quarterly)
Hurdle	RBI Policy Repo Rate	Not applicable
Estee's Performance Share above Hurdle	35%	NIL

- ▶ No entry or exit load
- ▶ Both fixed and performance fees is charged quarterly and debited directly in client's account
- ▶ The RBI Policy Rate may change once every quarter. This is subject to a maximum cap of 6.5% p.a. The hurdle shall be picked up at close of business on the last calendar day of each quarter and shall apply to the next quarter.
- ▶ 10-15 bps is charged to clients annually for fund accounting and audit charges. The applicable quarterly amount is debited in client accounts every quarter.
- ▶ Deposit pre-mature breakage charges and differential interest rate may apply in case of early redemption
- ▶ STT and other statutory trade charges are on actuals

Reporting Overview

- ▶ Fund accounting is done independently by a third party fund accountant which calculates investor returns and sends monthly performance reports directly to clients
- ▶ Clients are provided with the following:
 - Monthly Portfolio P/L Statement: This is provided to each client individually by the fund accountant by the third business day following the close of each month.
 - Client Ledger: This statement contains details of each debit and credit in the client's account, including interest income, trading profits/losses, TDS on interest earned, and fees. This is provided on request to our back office.
 - TDS Certificate for tax deducted on the interest income from the fixed / term deposit & is provided to the clients 20 days post the calendar quarter ends
- ▶ Pool Level audit: I-Alpha's track record is audited by Grant Thornton and a report is published annually
- ▶ Client-level audit: These are prepared by our auditor and are shared with the client once the financial year closes
